STOCK | OPTIONS | FUTURES | POSITIONAL | COMMODITIES

EMPOWERING INVESTORS WITH STRUCTURED MARKET RESEARCH AND TIMELY TRADING INSIGHTS.

About Invesia Research Services

Our Services, Your Growth

- Invesia Research provides a range of market research and trading-related services designed to support investors and traders across different market segments.

Key focus areas:

- Equity & Stock Research
- Stock Options
- Stock Futures
- Positional Trading
- BTST/STBT Strategies
- Equity Combo Services
- Bullion
- Energy
- Base Metals

Objective: Help market participants make more structured decisions using research-backed market insights.

Stock Cash Services

Stock Cash – Premium & Basic

- Invesia offers stock cash services designed around intraday market opportunities.

Key features:

- Intraday calls based on market movements
- Regular market updates
- Entry levels with targets and stop-loss
- Recommendations delivered through SMS/WhatsApp
- Different service levels for varying trading requirements
- A & B grade stock calls available under Stock Cash Basic

Suitable for: Traders looking for research-based opportunities in the equity cash segment.

Stock Option Services

Stock Options

- Options trading requires careful attention to market movements, entry levels and risk management.

Invesia's Stock Option service includes:

- Intraday option calls
- First and second target levels
- Stop-loss levels
- Regular market updates
- Recommendations through SMS/WhatsApp
- Follow-up guidance on recommendations

Focus: Structured trade setups rather than relying on unverified market tips.

Stock Futures Services

Stock Future – Basic & Premium

- Invesia provides research-based opportunities in the stock futures segment.

Service highlights:

- Intraday futures calls
- Market movement-based recommendations
- First and second targets
- Defined stop-loss levels
- Regular market updates
- SMS/WhatsApp recommendation delivery

Premium & Basic options allow traders to choose a service aligned with their requirements.

Cash Positional Service

Cash Positional

- Positional trading focuses on opportunities that may extend beyond a single trading session.

Key features:

- Calls based on prevailing market movements
- Multiple stock grades covered
- Maximum 3 positions at a time
- First and second target levels
- Stop-loss with every call
- Regular market updates

Purpose: Provide a structured approach for traders who prefer holding positions beyond intraday sessions.

STBT / BTST Futures

Short-Term Trading Opportunities

Invesia also provides **STBT/BTST futures services** based on market conditions.

BTST – Buy Today, Sell Tomorrow

Identifies potential overnight opportunities

STBT – Sell Today, Buy Tomorrow

Focuses on potential short-side opportunities

Service features:

- Market movement-based calls
- Maximum 3 positions at a time
- First and second targets
- Stop-loss levels
- Regular market updates

Equity Combo Standard

Multiple Equity Segments. One Combined Service.

The **Equity Combo Standard** brings multiple equity services together in one package.

Includes:

- Cash Basic
- Stock Future Basic
- Stock Option Basic
- Index Option
- Index Future

Additional features:

- Maximum 4 positions at a time
- First and second target levels
- Stop-loss on calls
- Regular market updates

Ideal for: Traders looking for broader exposure across multiple equity market segments.

Commodity Market Services

Beyond Equities

- Invesia's services also extend into selected commodity segments.

Bullions

- Gold-related market opportunities
- Intraday calls based on market movements
- Target and stop-loss levels
- Regular market updates

Energy

- Energy-market opportunities
- Market movement-based calls
- Maximum 3 positions at a time
- Target and stop-loss levels

Base Metals

- Opportunities in metals such as zinc
- Intraday market calls
- Target and stop-loss levels
- Regular market updates

What Makes the Service Structure Different?

A Structured Approach to Market Research

- Across its services, Invesia focuses on providing information in a structured format.

The service framework includes:

- **Research → Market Opportunity → Entry Level → Target → Stop-Loss → Follow-Up**
- This approach helps traders understand the key parameters associated with a recommendation instead of receiving only a buy/sell message.

Recommendation & Follow-Up Process

From Trade Idea to Trade Management

Invesia's service page illustrates a follow-up approach for recommendations.

1. Entry
Receive the recommended entry level.

2. Target
Monitor the first and second target levels.

3. Stop-Loss
Follow the specified stop-loss as part of the trade setup.

4. Partial Profit
Where applicable, partial profits may be booked after target achievement.

5. Follow-Up
Stop-loss levels may be revised as the trade progresses.

6. Regular Updates
Stay informed through ongoing market updates.

Communication & Accessibility

Timely Market Updates, Directly Delivered

Invesia provides recommendations and market updates through convenient communication channels.

Communication includes:

- SMS recommendations
- WhatsApp updates
- Regular market updates
- Follow-up on recommendations

Why This Matters

- Market opportunities can change quickly. Timely communication helps traders stay updated with the research and levels associated with their selected service.

Choosing the Right Invesia Service

Different Markets. Different Trading Requirements.

Trading Preference	Relevant Service
Equity Intraday	Stock Cash
Options Trading	Stock Option
Futures Trading	Stock Future
Multi-Day Equity Positions	Cash Positional
Overnight Futures Opportunities	STBT/BTST
Multiple Equity Segments	Equity Combo
Gold/Bullion Markets	Bullions
Energy Markets	Energy
Metal Markets	Base Metals

The right service depends on an investor's market preference, trading style, risk tolerance and financial objectives.

- Stock Futures Premium
- Cash Positional
- STBT/BTST
- Equity Combo Standard

Commodities

- Bullions
- Energy
- Base Metals

The service portfolio is designed to provide market research across multiple trading segments.

Why a Research-Based Approach Matters

Trade With Structure, Not Emotion

Financial markets can move quickly and unpredictably. A research-based approach can help traders focus on:

- Market analysis
- Defined entry levels
- Pre-determined targets
- Stop-loss discipline
- Regular updates
- Structured follow-up

The goal is not to eliminate market risk, but to approach trading with greater structure and discipline.
